## Challenge Finance live with Surecomp allFAC

**Surecomp, a leading provider of receivables management and trade finance solutions for the global financial services community, announced today that UK-based Challenge Finance Limited is in full production with allFAC, Surecomp's Java J2EE receivables management solution.**

Challenge Finance selected allFAC earlier this year, in replacement of another vendor, who failed to deliver the Challenge requirements.

"While we were more than delighted with the power, versatility and functionality of allFAC, the true test of a vendor's worth is their ability to meet implementation schedules. I am delighted with the positive response we received from Surecomp and the their adherence to rigid project milestones" commented Challenge Finance's Jim Beck

Offering his congratulations to Challenge Finance, Lee Kingshott, Surecomp's general management - receivables management solutions emphasized Surecomp's commitment to customer support "Surecomp's highly coordinated, professional implementation services teams ensure that projects are live and operational on time and on budget, and moving forward that customers receive the highest possible level of on-going support."
