Surecomp Global Hackathon

As a key industry player, our global hackathon gives you the opportunity to be part of the next cutting-edge application to shape global trade. Whether it's a solution to reduce risk, improve process efficiency or cut costs, whether it's AI, API, cloud or blockchain-based, for RegTech, cybersecurity, KYC or payments, we are looking for the epitome of innovation to help streamline trade finance operations.

Putting your technical genius to the test, participating teams will be exposed to an extended fintech ecosystem of global influencers, and will gain access, leveraging Surecomp's open-API platform, to banks' back-office trade finance to help solve the most pressing industry challenges.

Or maybe you'd rather adopt a more advisory role and become a hackathon sponsor? You could set a challenge you yourself would particularly like to see addressed and take a seat on the judging panel; you could help advise teams on the direction of app development, while by default exposing your company brand and positioning it at the forefront of trade finance digitization innovation.

The Event

- Virtual trade finance hackathon
- 48 hours to solve the most pressing challenges in trade finance
- Mentorship by Surecomp and hackathon sponsors
- Registration closes on 8th September
- Opportunity to pitch to the judging panel and win an Apple iPad Air
