

Cross-border payments management

Streamlining the delivery and traceability of international payments, CBPay enhances corporate customer experience by automating the management of foreign currency trading and transfer activity.

Reducing operational risk and optimizing processing efficiency, CBPay allows you to securely manage complete cross-border payment transactions from entries and requests to settlements and accounting.

Offering real-time data integration through API connectivity with other bank and third-party customer systems, CBPay is dynamic, cost efficient and easy to onboard. With flexible deployment models available, it can be hosted on premise, via a private or public cloud, or a combination.
