

High volume back-office trade finance processing

IMEX[®] is a robust back-office trade finance processing solution. Designed for banks with a high volume of trade finance activity, IMEX[®] handles the entire range of transactions including issued and received letters of credit (LCs), standbys, clean and documentary collections, clean payments, guarantees, reimbursements, syndications and participations. IMEX[®] also supports both integrated and stand-alone financing, discounting and forfeiting.

Adopted by major banks worldwide and with full SWIFT certification, IMEX[®] integrates seamlessly with front-office solutions and with all internal and external banking systems including accounting, AML, communications, treasury, accounting and security, among others. IMEX[®] serves as a real-time processing and decision-support system that vastly improves transactional throughput, operational productivity and bank profitability.
