

# Collaborative trade finance... just imagine.

Corporates of every size and type are challenged by the time-consuming and cumbersome, paper-based trade finance process. Managing multiple trade finance lenders with multiple credit limits across multiple geographies is onerous, errorprone and expensive. The inefficient manual communication across the entire trade finance ecosystem gives rise to unnecessary delays in supply chain, exposure to fraud and hampered revenue growth.

RIVOTM – our collaborative trade finance platform – is a centralized digital hub through which any trade and supply chain finance instrument can be managed to enhance efficiency and optimize customer service. This web-based portal provides open API access to every trade participant for a completely streamlined and sustainable transaction process.

### **How RIVO helps:**

### Collaboration

Real-time access to the entire trade finance ecosystem

### Acceleration

Digital document exchange for faster processing times

### **Risk Management**

Real-time credit limit and utilization management

### Sustainability

Transaction-based ESG tracking and scoring

### Security

Centralized document management for version control, transparency and auditing

Available anytime, anywhere to anyone... just imagine.

A web-based platform accessed via an intuitive, user-friendly interface, RIVO<sup>TM</sup> is available in a range of subscription packages based on transaction volume. Fast and easy to navigate, the solution is designed to bring together importers, exporters, financiers, insurers, agencies and freight forwarders to efficiently collaborate on finalizing the details of a trade finance transaction in the most timely way.

By using the platform to execute trade finance requests, corporates can benefit from corresponding with every party through a single channel which saves time, improves efficiency and ultimately drives growth.

## Key features and benefits

### Collaborate

- Collaborative management of documents; draft, issue, amend
- Real-time advice and update notification between ecosystem parties
- · Centralized communication for ease of tracking and version control

### Accelerate

- Acceleration of trade finance transaction lifecycle processing
- Electronic issue and exchange of MLETR-ready digital documents
- Efficient and timely resolution of document requests, queries, approvals and rejections

### Mitigate

- Monitoring of limits and utilization to effectively manage credit facilities with lenders
- Increased visibility of liquidity with payment plans
- Guaranteed regulatory compliance and transparency

### The RIVO™ solution is available in a range of standard packages indicated below:
