

Collaborative trade finance

We enable **banks** of every size and type to manage their trade finance business more efficiently.

Our collaborative trade finance platform **RIVO™** eliminates error-prone manual processing, **streamlines corporate communication** and **improves customer service** across multiple geographies and jurisdictions. It drives true collaboration and transparency across the entire trade ecosystem to **secure and accelerate finance requests**, mitigate risk and drive growth.

Our web-based digital hub accessed via an intuitive, user-friendly interface, provides open API access to every trade participant for a completely seamless and sustainable transaction process.

- Powerful application to manage your trade finance business
- Paperless processing with digital document exchange
- Flexible integration with the entire trade finance ecosystem
- Enriched data insights & decision support including ESG and fraud prevention

How RIVO helps:

Connect

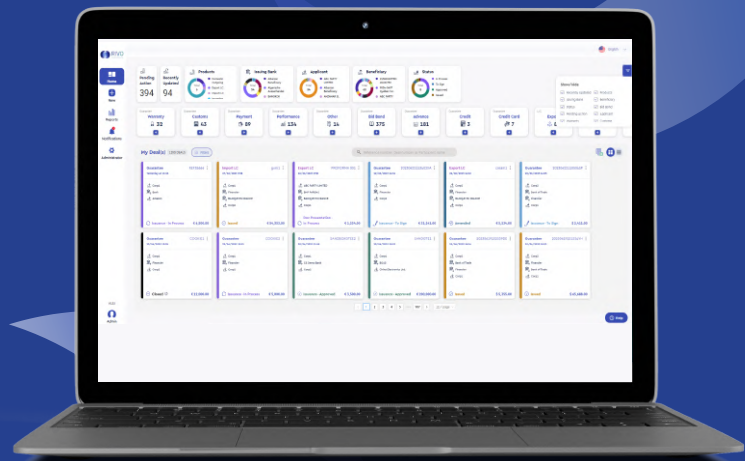

- Centralized corporate connectivity and beyond to the tradetech ecosystem
- Secure, digital communication channel, replacing insecure emails
- Reduced paper with integrated MLETR-compliant digital documents

Manage

- Real-time engagement with existing and prospective corporate clients
- Enhanced customer service delivery for retention and growth
- Broader customer insights with embedded Legal Entity Identifier (LEI)

Enrich

- Transaction-based ESG tracking and scoring for transparency and compliance
- Credit limit and utilization monitoring for 360° customer trade profile
- Duplicate invoice financing detection to prevent fraud

Fast and easy to navigate, the solution is designed to bring **banks** together with their **corporate clients, insurers, freight forwarders and other agencies** to efficiently collaborate on finalizing the details of a trade finance transaction. By using the platform to execute trade finance requests, **banks** can benefit from corresponding with every party through a single channel, saving time, improving efficiency and ultimately driving growth.
