

Collaborative trade finance

We enable companies of every size and type to manage their trade finance business more efficiently.

Our collaborative trade finance platform **RIVO™** eliminates error-prone manual processing, secures connectivity and improves visibility and control across every financial institution. It drives true collaboration and transparency across the entire trade ecosystem to streamline communication, accelerate finance approvals, mitigate risk and drive growth.

Our web-based digital hub accessed via an intuitive, user-friendly interface, provides open API access to every trade participant for a completely seamless and sustainable transaction process.

- Powerful multi-banking trade finance management
- Flexible integration with the trade finance ecosystem
- Enhanced data insights and decision support

How RIVO helps:

Connect

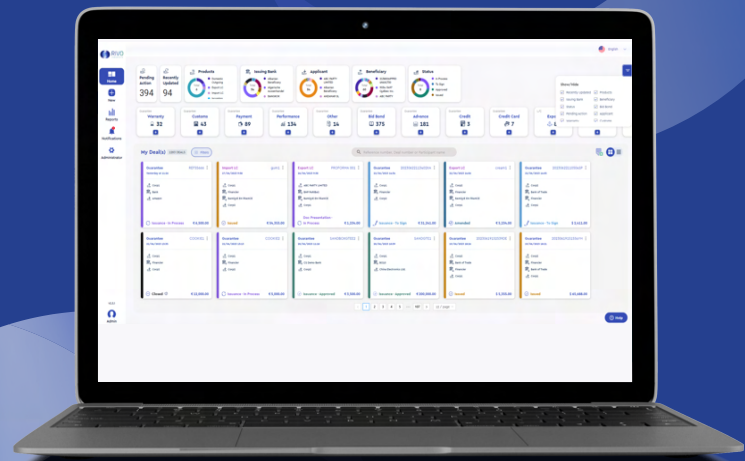

- Accelerate trade finance processing with full ecosystem connectivity
- Secure bank communication with direct, open API access
- Streamline internal system integration with easy connectivity

Manage

- Centralize management of trade documents; draft, issue, amend
- Monitor limits and utilization to effectively manage credit facilities
- Improve efficiency and timely resolution of document requests, queries, approvals, and rejections

Enrich

- Inform decision-making with value generating data insights
Increase visibility of liquidity with payment plans
- Achieve sustainable, paperless processing with electronic issue and exchange of MLETR-ready digital documents
- Mitigate risk with transaction-based ESG scoring and tracking

Fast and easy to navigate, the solution is designed to bring together importers, exporters, financiers, insurers, agencies and freight forwarders to efficiently collaborate on finalizing the details of a trade finance transaction. By using the platform to execute trade finance requests, corporates can benefit from corresponding with every party through a single channel, saving time, managing risk and improving control.
